Math News...

June 3, 2013

End of Year Benchmark Assessment:

Grades K-2: June 12 & June 13, 2013

Grades 3-5: June 13, 2013

FASTT Math

June 17, 2013- Final report for FASTT Math will be disseminated

What should I be working on now?

Kindergarten: Module 6- Analyze, compare, create, and compose shapes

Grade 1: All modules should be completed. Please revisit the following: make ten to add/subtract, number bonds, addition/subtraction and real world problem solving using bar modeling.

Grade 2: Module 7- recognizing angles, faces, and vertices of shapes

Grade 3: Module 7- Quadrilaterals and more challenging word problems

Grade 4: Module 6- Exploring multiplication

Grade 5: Module 6- Graphing/problem solving

How can I begin to prepare my students for the next grade?

Focus on the foundational standards outlined in Module 1. Foundational standards are the prerequisite skills needed to master the content taught in the module.

The modules can be found on our website www.rooseveltufsd.org (click on Washington Rose- Services-Math Lab-Teacher Resources) and on Engage New York.

Foundational standards needed bridge the gap between the grades:

Kindergarten-----Module 1 Grade 1

First Grade-----Module 1 Grade 2

Second Grade-----Module 1 Grade 3

Third Grade-----Module 1 Grade 4

Fourth Grade-----Module 1 Grade 5

Fifth Grade-----Module 1 Grade 6

Reminder: All math lessons should be **common core** aligned. Please continue to follow the curriculum map and action plan outlined in our last meeting. Thank you!
